PROFESSIONAL SUMMARY

Passionate Senior Unity Developer & Game Engineer with 6+ years of commercial and indie experience across PlayStation 5, Mobile (iOS/Android), and WebGL. Specialized in locked 60 FPS console runtime optimization (PS5 Low Energy Mode), complex enemy AI state machines, custom URP/HDRP shaders, and real-time multiplayer networking.

WORK EXPERIENCE

Mega Cat Studios - Game Engineer (Contractor - PS5) (Remote)

July 2024 - April 2026

- **Gameplay & AI Engineering:** Engineered assigned enemy AI behaviors and combat gameplay systems utilizing Finite State Machines (FSM) on God of War: Sons of Sparta (PS5).
- **Co-op Features & PS5 LEM Optimization:** Implemented new features, bug fixes, and stabilized locked 60 FPS on PS5 Low Energy Mode (LEM) for the Pit of Agonies local co-op mode via codebase refactoring, Scene Hierarchy audits, Playable Timeline inspections, Addressables pooling, and PSO VFX pre-warming.
- **Rendering Efficiency:** Partnered with VFX artists to optimize critical overdraw hotspots, analyzing profiling telemetry and draw calls to enforce strict console GPU budgets.
- **Crash Profiling & Telemetry:** Diagnosed root-cause memory leaks, reduced scene load times, and resolved critical crashes via deep Unity Profiler audits in collaboration with the internal console team.

DKMads Co., Ltd - Senior Game Developer (On-site)

Feb 2023 - April 2024

- **WebGL & Flutter Integration:** Architected and deployed optimized Unity WebGL games embedded inside Flutter mobile applications via InAppWebView and bidirectional WebAPI bridges.
- **Real-Time Multiplayer Architecture:** Engineered full-stack turn-based multiplayer WebGL gameplay using Socket.IO in Node.js (backend) and Unity WebGL (client) for real-time matchmaking.
- **Low-End Device Optimization:** Overcame single-threaded WebGL constraints and mobile browser memory limits on entry-level devices by engineering zero-allocation data structures.

Myanmar51 Studio - Unity Game Developer & QC Lead (On-site)

Nov 2020 - Nov 2022

- **Monetization SDK Infrastructure:** Re-engineered ad infrastructure by integrating AppLovin LionSDK across live titles, resolving complex Xcode iOS build conflicts and App Store submission blockers.
- **Sanrio Commercial Title:** Developed modular Daily/Weekly Bingo quest systems, multi-language localization (EN/JP), and reward algorithms for Sanrio's commercial title Tiny Park (10 mini-games).
- **Cinematic HDRP Promo Sequences:** Produced AAA-quality rendered promotional sequences in Unity HDRP using custom Shader Graphs, VFX Graphs, lighting setups, and Timeline animation retargeting.
- **Technical Mentorship & QC Lead:** Led Quality Control reviews and mentored junior developers on custom shader development, visual effects, and post-processing optimization workflows.

TECHNICAL SKILLS

- **Programming Languages:** C# (.NET), C++, Python, HLSL / GLSL, JavaScript, TypeScript, Dart, HTML5/CSS3.
- **Engines & Graphics:** Unity (Built-In / URP / HDRP), Unity Shader Graph, VFX Graph, Custom URP Render Features, Blender 3D.
- **Performance & Profiling:** PS5 Low Energy Optimization, Unity Profiler, Frame Debugger, Addressables, PSO Pre-warming, Object Pooling.
- **Platforms & Toolchains:** PlayStation 5, Android, iOS (Xcode), Unity WebGL, Flutter InAppWebView, Node.js (Socket.IO), Git / GitHub, Itch.io.
- **Languages Spoken:** English (Upper B2 - Professional Working Proficiency), Myanmar (Native), Japanese (N5~N4).

EDUCATION & CERTIFICATIONS

Technological University (Hmawbi) - Bachelor of Engineering in Mechatronics

Dec 2013 - Nov 2019

- **Core Engineering:** PLC ladder diagrams (pneumatics/hydraulics), PIC BASIC microcontrollers, theoretical Neural Networks, and C++.
 - **Certifications:** Design Patterns for Game Programming (Udemy, 2021) | Applied Data Science Specialization (Coursera, 2020) | IBM AI Engineering (Coursera/IBM, 2020).
-
